Election 2016 School Board Candidate Survey Peoria Unified

The Arizona Education census data from 2010 indicates that nearly 80% of Arizona schools spend less than \$1 per student on the materials and resources need to provide quality arts education in our schools.

How will you work to insure adequate dollars are budgeted to provide the tools and materials necessary to support standards-based arts education in the classroom?

Please take this opportunity to provide any additional comments about your views on arts education in our K-12 schools, or any other education issue you consider a priority as you seek a position on your district school board. (250-word limit)

I will continue to place an importance on retaining the arts as a vital part of the education at PUSD. I will assure that we try to fund as best as possible.

Funding will continue to be a problem until we either have a state legislature that values public education, or find a new funding source for public education. There are some possibilities for the latter. In the meantime it is important to become as efficient as possible with every dollar in order to retain programs like the arts that are vital to a sound education.

I feel the districts that can provide this will be the ones to flourish in the future. There is competition between charter schools and the traditional district schools . Competition is good, we need to offer a more well rounded education than the charters can.
