## School Board Candidate Survey

### Yuma Union High School

The Arizona Education census data from 2010 indicates that nearly 80% of Arizona schools spend less than \$1 per student on the materials and resources need to provide quality arts education in our schools.

How will you work to insure adequate dollars are budgeted to provide the tools and materials necessary to support standards-based arts education in the classroom?

Please take this opportunity to provide any additional comments about your views on arts education in our K-12 schools, or any other education issue you consider a priority as you seek a position on your district school board. (250-word limit)

Classroom success is most dependent on having dynamic and competent staff in place. I will work to make it a priority to find and hire such staff. Next, I will need to look at budgetary allotments per subject area to be able to insure that funds are being equitably distributed. Tuition tax credits are another avenue that might be able to assist underfunded programs.

Appropriate use of technology in the classroom is a very serious issue. I retired as a full time educator after 42 years of experience at levels K-12, and have spent the last three years as a substitute teacher primarily in public high school classrooms.

The frequent and improper use of technology (phones and computers) is destroying the effectiveness of the classroom educational experience.

We have a funding problem in this state for education. We are trying to survive on less money than ever before. I will continue to pressure our legislature to keep increase our funds so that we can do what you are asking.

The arts are extremely important and i support any and all efforts we are doing and hope o do to insure they are improve upon every year.

I can't do it alone, you need majority on the board to approve the funding in the budget. I will work to persuade the rest of the board.
